

## ACCESSORIES

### VANO TRIPOD

Attaches to VANO 175CV or 250CV. Makes positioning of units and direction of airflow easier by rotating 360° on a 45° plane. Spring loaded legs fold up for easy transport and storage. Weight: 19 lbs (9 kg.)

### TRANSPORT CART

Heavy duty cart allows easier transportation of VANO 175CV and 250CV. VANOs can remain on cart during operation. Includes crane lifting loop. Weight: 25lbs (11kg)

### EXPLOSION PROOF (EP) ACCESSORY PACKAGE

Consist of 25' hazardous location cord (not standard on explosion proof units). Plugs can be provided to your specifications at additional cost.

NOTE: Vano EP Accessory Package also includes junction box.

### FLEXIBLE DUCT and CANISTER

Collapsible and wire supported flexible duct available in 8" (203 mm), 12" (305 mm) and 16" (406 mm).

High density, polyethylene storage container protects and allows transporting duct easier.

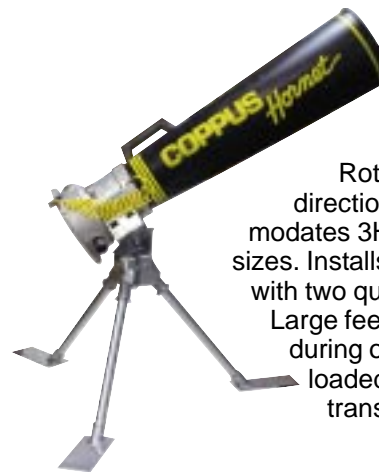

### CADET VANEAXIAL TRIPOD

Quickly and easily attaches to lift vaneaxial models from ground. Pivots total of 90° (45° up, 45° down) to help direct airflow.

### CADET DUCT CASE

Easily attaches to outlet end of Cadet Vaneaxial units. Makes storage and transport of duct convenient and easy. Includes 15' x 8" dia. flexible duct with coupling attachment and connection straps.

### JECTAIR TRIPOD

For stationary, long term usage. Rotates 360° for precise direction of air flow. Accommodates 3HP and 6HP Jectair sizes. Installs quickly and easily with two quick-release clamps. Large feet provide stability during operation. Spring loaded legs fold up for easy transport and storage.

### FUME ARM

Allows precise location of exhaust hood for capturing fumes and particles during welding operations. Spring loaded arm available in 10' and 5' lengths. Arm can support up to 6" flexible duct.
